SUMMARY

Full-stack software engineer with experience in scalable web applications and database management. Strong competitive programming background with a focus on algorithms and problem-solving.

EXPERIENCE

Software Engineer — **Makebell.com (Remote, Hong Kong SAR)** Apr 2025 – Mar 2026

- Developed a legal/financial English–Chinese translation pipeline ensuring terminology consistency and context-aware output, successfully processing 500+ page Word documents and achieving around 98% translation alignment when a reference model document was provided.
- Designed and deployed a RAG pipeline for PDF ingestion and knowledge-base construction on a Weaviate vector database.
- Built LLM-powered Next.js apps for legal document and file management workflows.
- Implemented a natural-language-to-SQL interface for chatbot services, enabling conversational data querying.
- Developed centralized authentication with Supabase for secure, unified access across multiple applications.

PERSONAL PROJECTS

[habib36.dev](#) — Personal Portfolio

A full-stack personal portfolio website built with Next.js and Payload CMS, featuring dynamic project showcases, a blog with rich text editing, interactive animations, and an integrated admin panel for content management.

Collaborative Team Hub A full-stack collaboration platform for team goal management and real-time Kanban tracking, built with Next.js, Node.js, and PostgreSQL, featuring optimistic UI updates and advanced RBAC.

StreamFlare — Movie & TV Show Streaming App

A streaming app built with Node.js and React.js, offering personalized recommendations, subscription management, and search features.

AI Ping Pong Game

AI-driven Ping Pong game using fuzzy logic for adaptive gameplay, implemented in Python with Pygame.

THESIS

State Recognition of Traffic Signals for Autonomous Vehicles
Developed a YOLOv8n-based traffic-signal detector (mAP@50: 0.936) and deployed an optimized NCNN model on Raspberry Pi 4 for real-time inference.

EDUCATION

B.Sc. in Computer Science and Engineering
CGPA: 3.06
Khulna University of Engineering & Technology (KUET)
Jan 2020 - Aug 2025

TECHNICAL SKILLS

Programming Languages:
Python, TypeScript/JavaScript (Node.js), Java, C/C++

Frameworks & Libraries:
Next.js, Express.js, Django, FastAPI, LangChain

Databases & Storage:
PostgreSQL, MySQL, Redis, Supabase, Weaviate

AI, LLMs & Data Systems:
RAG pipelines, Vector search, Embedding models, OCR/Document processing, ViT (e.g., MinerU)

Software Architecture:
Design Patterns (Factory, Strategy, Repository, Observer), Clean Architecture, SOLID Principles

DevOps & Tooling:
Git, Docker, CI/CD, Linux

ACHIEVEMENTS

- SGIPC Intra-University CP Contest: Ranked 6th
- Solved 3,000+ problems across competitive platforms

LeetCode
[Segfaulted](#) — **Knight** Max Rating: 1882

Codeforces
[Segfaulted](#) — **Specialist** Max Rating: 1558

CodeChef
